Estuarine and Coastal Ocean Science: An Introduction

*Linda C. Schaffner*

School of Marine Science, College of William and Mary
Virginia Institute of Marine Science

Alongi, D. M. 1998. Coastal Ecosystem Processes. CRC Press (includes a wide range of ecosystems, with coverage of both temperate and tropical systems)

Davis, R. A. Jr. 1985. Coastal Sedimentary Environments. Springer-Verlag. (covers physical coastal processes of a variety of environments, including estuaries, deltas and beaches)

Dyer, K. R. Estuaries, Physical Introduction. John Wiley & Sons (physical processes in estuaries, including sediment transport)

Mann, K. H. 2000. Ecology of Coastal Waters, With Implications for Management. Blackwell Scientific (provides excellent introductions to estuarine, coastal and shelf ecosystems, with chapters on major habitats, fisheries and management)

Valiela, I. 1995. Marine Ecological Processes. Springer (not estuarine/coastal specific, but an excellent reference text with considerable relevant information)
